

REAL • OBJECTIVE • RESULTS

“Being a good steward of the environment and our communities, and being an efficient and profitable business, are not mutually exclusive. In fact, they are one and the same.”

– Lee Scott, Wal-Mart

“Sustainability is about profit...it is the opportunity of the century.”

– Ben Clarke, Kraft Foods

“Companies with their eye on their ‘triple bottom-line’ outperform their less fastidious peers on the stock market.”

– The Economist

Who We Are

PCX Energy Services, an Ohio based company, assists commercial, retail and industrial companies in capturing real, verifiable savings by

1. improving energy efficiency
2. reducing waste
3. implementing sustainable business practices that are beneficial to the environment and your company's bottom line.

Energy & Sustainability Solutions

Improve your Profitability

Conservation of energy coupled with the reduction of waste can *save 20% or more on operating expenses*. A sustainable energy plan decreases an organization's utility expenditures, as well as its carbon footprint.

Financial opportunities from tax incentives, rebates and government funding are continually changing.

An objective, disciplined approach from PCX Energy Services LLC will identify energy savings and sustainability initiatives that will improve your company's profitability.

How Sustainability Affects Your Company

Sustainability is the practice of meeting the needs of today without jeopardizing the resources of tomorrow. It involves the wide array of issues related to improving a company's environmental stewardship, social responsibility and economic performance.

Implementing a sustainable energy strategy benefits your customers, employees, shareholders and community.

By becoming a better steward of energy resources and through greater awareness of its social responsibility, an organization can improve its economic performance thus achieving "triple bottom line" results.

What We Do

PCX Energy Services incorporates a ***four-phase approach*** with complete transparency in all aspects of project funding and fee structure.

- I. **Assess** and **analyze** current operations and prepare an Energy Consumption and Sustainability Report.
- II. **Develop** an Energy/Sustainability Plan and prioritized energy-efficiency and waste-reduction initiatives.
- III. **Prepare** project work scope and solicit multiple proposals from qualified resources to implement the prioritized projects identified in the Energy/ Sustainability Plan.
- IV. **Manage** project implementation and **verify** results.

Advisory Team

Martin A. Klammer

Marty has an extensive background in design engineering, manufacturing, operations management and regulatory compliance. Throughout his career, he has held key engineering and management positions with a number of leading manufacturers within the aerospace, HVAC, marine controls and automotive industries. Marty earned his J.D. and Bachelor of Science in Industrial Engineering from Cleveland State University.

Tom Sherman

With more than thirty years of experience in the energy field, Tom has implemented comprehensive energy plans that have addressed lighting, HVAC, air quality, wastewater management and operational best practices. With FirstEnergy, he developed energy management solutions for national retail, commercial and industrial clients. Tom earned his Bachelor of Science in Physics from Northeastern Illinois University and an MBA from Lake Forest Graduate School of Management. He is also a member of the IEEE and the Association of Energy Engineers.

Mark A. DiLillo

Mark is a seasoned operations executive with a background in many diverse industries ranging from aerospace to polymers. Prior to PCX, Mark was president and CEO of Endura Plastics, Inc. which specialized in the design, manufacture and assembly of critical safety products for the HVAC and automotive industries. Mark has a Bachelor of Science in Engineering from Cleveland State University. His Board affiliations include Endura Plastics, Inc., PolymerOhio, Inc. and PCX Holdings LLC.
